

# Vario-Hub, height-adjustable working table

*We set air in motion*

### **Description**

Thanks to an electromotive height adjustment processes at production and assembling workstations can be optimised according to ergonomic aspects.

Feedings or operating levels can for example be adjusted to the individual body height of the employee - an important issue especially in case of shift workstations. By avoiding unhealthy postures a premature fatigue is prevented and illness-related absences are demonstrably reduced.

With the push of a button the employee is able to adjust

und optimise his working environment according to his needs.

A reliable technology and a simple installation during your application are essential!

---

### **Technical Data**

Voltage [V]: 230

Power Frequency [Hz]: 50

Height [mm]: 1.140

Depth [mm]: 1.100

Length [mm]: 1.750

---

**Prod.No. 5680001**

**Vario-Hub working table**

**3750,00 EUR\***

## Accessories

Suction arm 2 m 150 mm hose type internal joints  
Appropriate to welding fume suction with mobile units
